This includes identification of agencies responsible for tourism development, spatial development planning, infrastructure planning, as well as environmental, social and cultural management. The service provider must include in the analysis the following specific activities: ○ Identification of the planning authority/authorities within the Province for the various components ○ Identification of all stakeholders and collaboration arrangements between them to develop the tourism program; e.g. governments, state owned entities, private sector, communities and nongovernmental organizations. ○ Evaluation of the regulatory framework within which planning implementation will occur. ○ Review and evaluation of relevant existing spatial and sectoral development plans (including plans for national parks and heritage sites, including all regulatory instruments and associated policy documents currently in place to guide and control development)	

2.	Analysis of demand and opportunities for tourism destination area development; The service provider must analyse local economic conditions and development trends to obtain a detailed understanding of the current situation and development potential of tourism in terms of population, employment, and regional economy with special focus on tourism development. This analysis will include the following specific activities: ○ Assemble and review information on population (including ethnic minorities, vulnerable groups, Indigenous Peoples (IPs)), employment and unemployment growth trends. ○ Assemble and review information on all areas of potential economic growth, such as agricultural production, mining, commercial enterprises, industries and services including tourism and travel, to identify and assess the linkages between the various sectors of the economy affecting and affected by tourism development within the City. ○ Assemble and review information on domestic and foreign visitors and related accommodation, facilities, and attractions, past visitor trends and projected growth, and related demand for new tourism enterprises and services ○ Assemble and review information on capabilities and skills of local businesses, especially local organizations and communities to play an active role in, and benefit from, accelerated tourism development.	
3.	Analysis of baseline conditions of spatial plans, infrastructure gaps and visitor attractions and facilities; The service provider will thoroughly analyse all aspects of relevance for tourism development, including spatial development trends and patterns, infrastructure and service provision, visitor attractions, and visitor facilities. The analysis should result in an in-depth understanding of the baseline condition for tourism development within the City.	

4.	Articulation of environmental, social, socio-economic, and cultural heritage opportunities and constraints; The Tourism Sector Plan must guide the scale and spatial location of future spatial growth, infrastructure, and establish policies and practices to ensure that key environmental, social, community and cultural heritage assets are protected and impacts are properly managed and monitored. An in-depth understanding of constraints and opportunities for development of the tourism is indispensable to ensure that tourism development will be sustainable. The underpinnings of the tourism industry are the cultural heritage, natural environment (including biodiversity), and unique cultural identity. The service provider therefore must collect and interpret the relevant baseline data and develop maps and reports of challenges, opportunities, and constraints for environmentally and socially sustainable growth and for the various types of tourism facilities and supporting infrastructure. Potential environmental and social impacts and risks of tourism development in general, and of the proposed infrastructure development and other activities specified in the Sector Plan, will be assessed.	
5.	Detailing of the preferred development scenario; • In close collaboration with relevant government agencies, the private sector and local communities in the four regions, the service provider must prepare detailed phased development plans (10 years planning horizon) for all current key tourism areas within the tourism destination area (existing clusters of hotel and visitor facilities and attractions) and for new key tourism areas that have been prioritized for tourism development in the first 5 years. The list of identified strategies, objectives, policies and programs included in the 5year plans should be phased annually • Identify local government and community awareness and capacity building needs for inclusive tourism development. • Identify opportunities and needs for skills development for	

	tourism market supply (education, SMME development). Identify institutional arrangements to implement the development scenario.	
6.	Formulation of the tourism sector plan - Prepare a phased tourism development plan - Prepare an institutional development program - Prepare a capacity building program	
7.	Ensure active stakeholder engagement. Pro-active outreach and institutional presentations are essential to engage the private sector, local communities, local governments, and related central government institutions. Building on the initial stakeholder mapping and based on the stakeholder engagement plan (as part of the inception report), through regular consultations with government institutions and other stakeholders, the service provider should seek feedback and consensus on all intermediate and final deliverables. The service provider must ensure that all comments and/or considerations raised during the formal approval and ratification process are reflected in the final draft of the Tourism Sector Plan.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a) take all reasonable steps to prevent such abuse;
 - b) reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c) cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
